

## Stratocell

High-performance non cross-linked closed cell polyethylene foam with excellent compactness based on advanced technologies. Slabs and rolls available in a wide range of densities and thicknesses, also in the version with adhesive.

We produce shaped parts to specification by die cutting, plotter cutting and waterjet cutting. Ideal for protecting products from shocks.

## Xtracell

Xtracell is an innovative product to create solutions guaranteed against impacts and abrasions. It is a corrugated closed-cell polyethylene foam sheet which coupled to a polyethylene sheet gives it excellent solidity. It replaces and improves performance, giving enormous benefits. Xtracell does not deflate even under heavy pressure and therefore can be used more than once. Available in various sizes and densities, it is an excellent material for many types of packaging. In addition to the reels, we can produce sheets, bags and tubes.

## Profiles

"L", "U", tube profiles and for glass. Designed to protect the edges and corners of tables, shelves, glass, marble and appliances. The polyethylene used is completely recyclable, odourless, waterproof, excellent as a thermal insulator with a high anti-shock and anti-vibration power.

## Edge protectors

Two and three-way foam edge protectors, suitable to protect delicate corners subject to scratches. They absorb shocks and vibration during transport.

Totally recyclable material.

They are easily installed, adhere well to the product, ensuring protection from chipping and impact. Available in various sizes.

# THE-MA PACKAGING DIVISION

Packaging means protecting and preserving a product, increasing its value, extending its shelf-life in order to make it more attractive and easier to transport.

## Packaging Tapes/Customised Adhesive Tape

We have a printing and cutting centre with highly qualified machinery, which allows us to print and cut PPL, PVC, smooth or embossed supports.

## Neutral and coloured adhesive tapes

Packaging tapes of various thicknesses, weights and sizes, which satisfy any requirement. We offer a complete range of adhesive tapes in PPL and PVC, Havana, white, transparent and coloured, in various sizes for manual or automatic packaging. Dispensers are also available with "low-noise" technology to silence noisy tape.

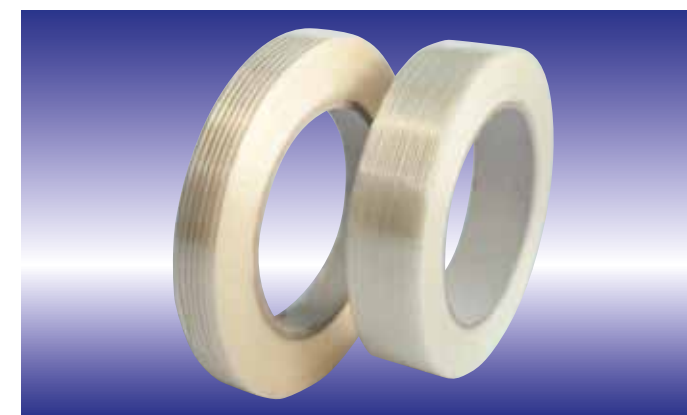

## Distributed brands

Our selection of the most qualified brands in the field of adhesive technologies. A consolidated partnership collaboration

## Strapping and reinforced tape

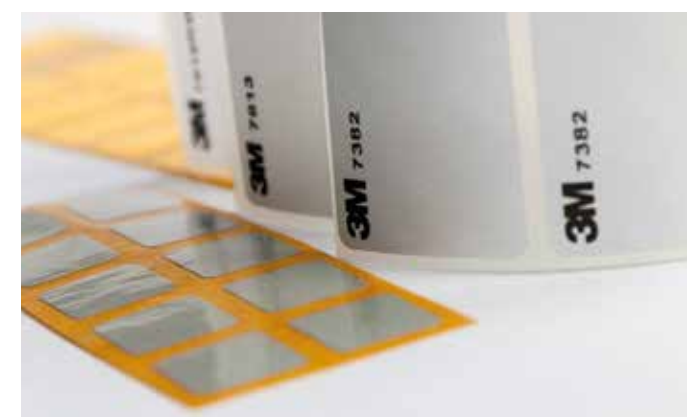

Special tapes for binding, reinforcing and protecting packaging both during transport, handling and during storage. An "adhesive strapping" with excellent resistance to stretching and breaking. Strapping tapes for palletizing and belting heavy loads, available in orange, black and in the special blue colour version which leaves no traces of adhesive. Filament tapes to reinforce the fastening of heavy packs, available in single and bi-directional versions.

## Labels

Adhesive labels on roll, in fanfold and on sheet. Anti-shoplifting labels for product safety. Available in various materials such as paper, polypropylene, polyester and vinyl material. Can be used in various product sectors:

- food
- pharmaceutical
- industrial detergents
- packaging
- and many more

## Paper tape

Paper tapes for masking and surface protection with hot melt adhesive and solvent, available in standard sizes, with the possibility of made-to-measure cuts. Wide selection of products for every professional need; from the small maintenance and repairs sector to high precision decorations, oven and outdoor painting.

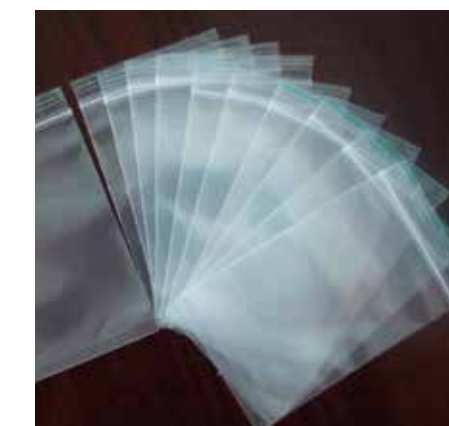

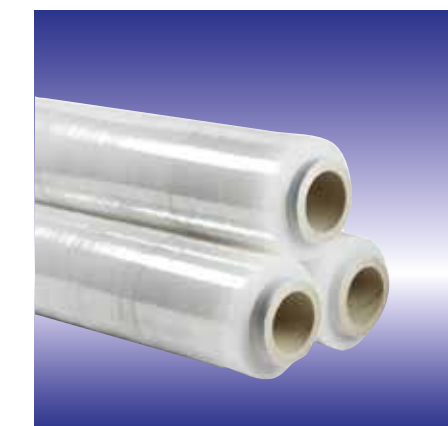

## Stretch Film

Ideal for wrapping packages and pallets, ensuring safe transport, firmly fixed and protected from the weather. Our assortment includes rolls of manual and machinable stretch film. Available transparent or coloured for the privacy of your loads. On request customised stretch film.

## Neutral and printed low density polyethylene (bags, tubular, single-fold, leaf)

The available sizes are: tubular, single-fold, leaf and bags with or without "mini-grip" pressure closure, all customisable with your logo. Thanks to the pressure hinges, the contents of the bags are weatherproof and protected from UV rays. High density PE / HD (cartene) bags are produced with a minimum thickness of 18 my.

## Polyethylene bags

It is a closed-cell product with variable densities. Soft, light and resistant, it is suitable to satisfy all packaging requirements, adapting to the shapes of the products to be protected, safeguarding them from repeated impacts, humidity and temperature changes. It is a 100% recyclable, non-toxic, odourless product which is perfectly waterproof. There is also the

adhesive version.

Available in rolls, sheets, envelopes and custom-made tubes.
